# Wet Well Fall Protection

## Wet Well Fall Protection Provides Additional Layer of Operator Safety

Wet Well Fall Protection is yet another Smith & Loveless innovation for pump station operator safety. Available with S&L Wet Well Mounted Pump Stations, Fall Protection is an aluminum grate platform that is installed beneath the manway cover and protects operators, tools and equipment against accidental falls into the wet well without any limitation of pump station access or performance.

The grate is strong enough to hold the weight of nearly any individual, up to 300 lbs\* (135kg). Available as an accessory with new orders of all Classic and **FORMULA X**® WWMPS in 4', 5' and 6' (1.2m, 1.5m, 1.8m) wet well sizes, Fall Protection is also an easy and affordable retrofit solution to ensure total pump station safety at all times.

### Features & Benefits

- Provides additional operator safety
- Allows viewing of the wet well when closed
- Easily opened to gain access to the wet well
- Comprises bar grating, stainless steel hinges and an easy-lift handle.
- Easy to install as a retrofit
- Can hold up to 300 lbs\* (135 kg)

#### Design Parameters

**Sizing:** 4', 5' and 6' wet well sizes  
(1.2m, 1.5m, 1.8m)

**Weight Limit:** 300 lbs\* (135kg)

Materials include an aluminum bar grating and stainless steel hinges

### Retrofits

To order Fall Protection for an existing wet well, call your local Smith & Loveless representative, or the S&L After Market Division at 1-800-922-9048.

Above: view of an open wet well grate. Right: As a pump station operator demonstrates, accessing a wet well with fall protection is as easy as pulling the handle.

\* While the platform can hold up to 300 lbs (135kg), it should not be used as a work platform as shown at left.
