

SMITH & LOVELESS INC.

# S&L in Canada

## Pre-Engineered Solutions for Canada's Water & Wastewater Projects

Smith & Loveless Inc. is a global leader in pre-engineered water and wastewater treatment systems with 60-plus years of experience. We've supplied numerous systems in Canada, helping to improve its infrastructure and quality of life. We offer treatment plants, clarifiers, grit removal systems, pump stations and other equipment to this region. We also maintain local representation of our company in different offices throughout the nation. Please contact us by e-mail ([answers@smithandloveless.com](mailto:answers@smithandloveless.com)) to locate one nearby. *Listed below are some recent S&L installation locations in Canada.*
