Pre-Engineered Solutions for the Pacific Rim's Water Problems

Smith & Loveless Inc. is a global leader in designing and manufacturing pre-engineered water and wastewater treatment systems—backed by 55 years of experience. With more than 300 installations, we've supplied numerous systems in Asia's Pacific Rim area, helping to improve its infrastructure and quality of life. We offer treatment plants, clarifiers, grit removal systems, aerators, pump stations and other equipment to this region. We also maintain local representation of our company with several offices throughout the region. Please contact us by e-mail (answers@smithandloveless.com) to locate one nearby.
